

FAUX PANELS - Touch-Up Kit Paint Guide

Recommended for all Antico Elements installations. The touch-up paint helps you finish your project expertly. You can paint caulking and conceal holes, scratches or sanded areas.

1. Remove any dust from the areas you will be painting/touching up.
2. Shake the jars of paint well before applying color.
3. The “base” colors are solvent-based and can be cleaned with lacquer thinner.
4. The other colors in the kit are water-based and can be cleaned with mild soap and water.
5. Mix multiple paint colors in a bowl to create the perfect shade.
6. Apply paint with a paint brush or cotton swab.

Don't hesitate to contact us should you have questions.
